I assisted graduate students in preparing the “Agrégation”, a French national highly competitive exam that allow the successful applicants to obtain a position as undergraduate teachers. The training consists in preparing during a full year a selection of about 150 topics in physics and chemistry (undergraduate level). The applicants pass written exams in Physics and Chemistry before being asked to give two lectures of 50 min each and to present a consistent set of experiments during 45 min for the final exam which spans over 3 days. I wrote several contributions (in French) available on my website as well as a prep-book of about 250 pages that include exercices, advice, etc.
